# Fast Track Production

Professional Business Management Seminar

## Highlights:

**Fast Track Production** demonstrates how to eliminate the barriers to efficient production and shows the most effective use of people, space, and time. Deliver vehicles faster, increase capacity and add dollars to the bottom line by developing and implementing new production systems. Fast Track Production eliminates inefficiencies by streamlining procedures for scheduling, parts handling, payment methods, supplements and planning the repair process.

## Who Should Attend:

Collision Center Managers, Damage Writers, Customer Service Representatives, Technicians, Management support staff, Production Managers and Coordinators

## Key Points:

- Understanding production management
- Increasing facility throughput
- Developing production systems for:
  - Scheduling
  - Paperwork and information flow
  - Parts relationships
  - Sublet/specialty functions
  - Payment methods/supplements
  - Standardizing on-line and off-line repair processes
  - Eliminate production inefficiencies and interruptions
- Effectively utilize VisionPLUS® OnLine to measure and improve performance

## Learning Objectives:

Upon successful completion, participants should be able to:

1. Recognize the importance of increasing the output.
2. Understand how the development of systems can prevent errors, idle time, and delays in the production process.

Training approved for Gold Class and Platinum points through the I-CAR Industry Training Alliance<sup>SM</sup>
