Introduction to VisionPLUS® OnLine

1-Day Interactive Workshop for Collision Centers, Distributors, and Sales Representatives

Highlights:

Introduction to VisionPLUS® OnLine (VPOL) introduces students to the VisionPLUS® software including: Monthly Reporting, Production Management and the Dashboard. During the workshop attendees will learn how to navigate, enter or upload data, set goals and view reports. With VPOL a collision center can improve performance with assessment tools, monthly reporting of key performance indicators (KPI's) and a wide range of tools and forms tied to 10 major business sections. Measuring and analyzing data is fundamental to growth and with the *Business Improvement Center* improvement has never been easier.

Who Should Attend:

Distribution and BASF Representatives and Personnel, Collision Center Managers, Accounting and Administrative Personnel, All Other Management Personnel

Key Points:

- Dashboard functions
- Self improvement help
- Production management software
- Measuring for improvement
 - Business evaluation
 - Setting realistic goals
 - Collecting accurate data
 - Using benchmarks
- Monthly reports
 - Paint department
 - Collision center
 - Business profile
- Tools and forms
- VisionPLUS® University

Learning Objectives:

Upon successful completion, participants should be able to:

1. Understand the fundamentals of Management by Objectives.
2. Navigate and effectively use VPOL's major components.
3. Utilize VPOL starting with the Paint Department.
